Position Summary

This position will be integral part of the Software Development team working on key Enterprise projects through the full software development lifecycle. We are looking for a candidate who is passionate about full stack web applications, specializing on the server and services that the applications depend on.

The ideal candidate has a good understanding about REST service architecture, server-side application frameworks like ASP.NET and other server-side technologies that support web applications.

Responsibilities & Duties

- Design and Development of core business applications using C#, ASP.NET 4.0, .NET 4.5 Framework, MVC, MS SQL Server
- Understand and translate business requirements into effective technical solutions and automate business processes to drive efficiency
- Developing Web Services and consuming them to integrate with other software solutions across enterprise using C# .NET.
- Work closely with development team leads & QA Team in a rapid development mode.

Qualifications Needed:

- Expert with RESTful web API development on both producer and consumer sides
- Strong knowledge of .NET web framework, C#.NET, ASP.NET, MVC, Entity Framework, ADO.Net, LINQ Queries, Bootstrap
- Strong experience with database design and development for MS SQL
- Daily use of typical IDE (Visual Studio) and source management tools such as TFS
- Strong understanding of object-oriented programming

- A strong emphasis on code quality and unit testing
- Strong analytical skills and problem-solving aptitude.
- Good understanding of Mobile Design concepts and User experience considerations is a plus.
- Experience with Cross platform mobile application using Xamarin is a plus
- Must possess strong written and verbal communication skills; be a good team player, ability to quickly grasp & understand business requirements and work in a deadline driven schedule.

Benefits for Full-Time Employees

- 401K with employer matching
- Health, Dental, Vision and Life AD&D options
- PTO & Sick Leave
