

GSO DTT Wine Shipping Preparation Requirements

Packages must be prepared and labeled according to the GSO DTT shipping standards. GSO will not pay damage claims for shipments that are not packaged properly.

Proper package preparation is defined as:

- Original, full-case winery packaging required.
- Package must contain its original contents (no bottles removed).
- To minimize damage, cases should be oriented with the bottles “neck-up” for shipping.
- A GSO-Compliant bar-coded address label must be applied to the top (cork side) of each package.
- A GSO Select Wine Service (orange) label must also be applied to the top of each package.
